

Zebec carries out marine inspections and surveys, spanning across different vessel types and cargoes.

Our inspection team comprises of a highly qualified and trained pool of Marine Engineers, Master Mariners, ex-Shipyard senior personnel and Steel / Electrical / Paint coating experts.

Zebec can deploy personnel as per your inspection requirements.

Zebec undertakes vessel inspections on behalf of:

- Ship owners
- Ship managers
- Banks
- P & I clubs

Our expertise encompasses the entire range of survey and inspection activities and includes:

- Cargo handling management
- Insurance surveys for loss assessment
- Vessel pre-purchase inspections
- STS operations
- Claims handling
- Loading Master Services for liquid cargoes
- Expeditior Services for dry cargoes

Vessel Pre-purchase Inspection

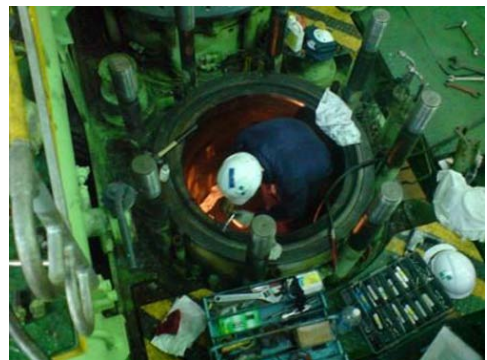

Our inspection reports present a detailed analysis of the "as sighted" condition of the hull and machinery of the vessel and extracts of on-board maintenance.

In addition we also present the client with likely repairs, upgrades, renewal, and details of areas that may be of concern.

Vessel Life Extension & Up-gradation Studies

Zebec carries out extensive "vessel life extension" studies for Ship owners who are keen to trade their vessels beyond their normal age.

The life extension program begins with an in-depth vessel inspection wherein all components of the vessel are closely inspected, documented, analyzed and upgraded. The life extension program can further be dovetailed with our asset integrity management system, to provide a comprehensive and holistic service.
