

Zebec Marine Consultants & Services provides the following survey and inspections services:

- Pre-vetting Inspections for Oil and Chemical Tankers
- Pre-Right ship Inspections for Bulk Carriers
- On board training for vessel's crew covering the owner's HSSEQ systems
- Internal Audits for all types of vessels
- Initial / first vetting inspections assistance for new builds and change of management vessels
- Super-cargo services
- Tank cleaning expeditors
- Tanker Surveys – Ullage, Draft Surveys, Cargo sampling and Cargo supervision

- ❖ Pre Vetting / Right ship inspection would consist of a 1-2 day visit to the vessel when she is at port. For a thorough inspection and in depth analysis we prefer that our inspector sails on board the vessel for a period of 7-10 days.
- ❖ Daily onboard training sessions are carried out during pre-vetting / pre-right ship inspections
- ❖ The training involves company's HSSEQ systems, bridge team management, safety drills or any other specific training required to be imparted by the client
- ❖ We provide tank cleaning expeditors to supervise and assist in various tank cleaning operations for difficult cargoes and change of grade from black to white products, to ensure the operation is carried out efficiently, in the shortest time possible and without causing contamination to the next grade to be loaded.

Why Zebec

We provide a professionally managed operation with an emphasis on quality and integrity. Our team of Master mariners and Chief engineers consists of well experienced personnel with expertise that spans across most vessel types from Liquid cargoes – Crude, products, chemicals and gas to bulk, containers and break-bulk and a passion to do an excellent job.
